"Guided Missile Propellants Availability"
OPR Coordinator, 214 ... 22/5 ...
Guided Missiles Intelligence
Committee

FROM: Chairman, EDIC Working Group on Propellants and Fuel Additives

SUBJECT: Seminar on Propellant Research Programs

1. At the first meeting of the EDIC Working Group on Propellants and Fuel Additives, on 16 December 1955, it was agreed that the OSD member, Col. Robert W. Green, USAF, would arrange at the earliest practicable time a briefing seminar on past and current development programs of missile propellants and other high-energy fuels. Following the Working Group meeting, numerous questions for the seminar were received by the Secretary of the Working Group and were duly forwarded to the OSD member. Considerable time has elapsed since the original plans for the seminar were made owing to the preoccupation of all personnel in the economic defense field with the preparation for major international negotiations.

2. Col. Green has now advised that he has made arrangements for staff members of the Solid Propellants Information Agency and the Batelle Memorial Institute to provide the requested briefing on a need-to-know basis for personnel from EDIC member agencies. It is expected that this briefing will take place at Central Building, 2430 E Street, N.W., probably during the week of 14 May. The briefing will take two days and will consist of morning and afternoon sessions on both days.

3. Addressees of this memorandum are asked to attend a planning session for the seminar on Thursday, 3 May, at 0930 hours in Room 2C840, Pentagon, to set the definite date for the briefing and to discuss security arrangements, and the extent of coverage of the proposed presentations. Col. S. M. Brewer, USAF,
